

Hiding Objects Using ActivInspire

1. Select Object
2. Select Object Edit Menu
3. Select Property Browser
4. Select Action Browser
5. Select Object Actions
6. Select Hidden
7. Select Target from Action Properties
8. Select item you want to hide/reappear
9. Select Ok
10. Select Apply Changes

Now that you have completed these steps, hover over your originally selected object and you should see a blue arrow appear. You should see that something is hiding/reappearing as often as you click on that object.
